

POLU SHYAM SUNDER REDDY

Hyderabad, India | 9948491312 | polushyamsunderreddy@gmail.com | github.com/shyamsunderreddypolu | linkedin.com/in/polushyamsunderreddy

CAREER OBJECTIVE

IT undergraduate (B.Tech, expected May 2027) with strong fundamentals in Core Java, OOP, and Data Structures, seeking a Java Developer role to contribute to scalable backend systems and API integrations. Hands-on experience with Spring Boot, Hibernate/JPA, and RESTful APIs through an internship and independent projects, using MySQL and Git. Comfortable using AI-assisted coding tools to speed up development. Strong problem-solving mindset, clear communication, and eagerness to learn in a fast-paced, team-oriented environment.

EDUCATION

Guru Nanak Institutions Technical Campus (GNITC), Hyderabad, India

Expected May 2027

Bachelor of Technology in Information Technology | CGPA: 8.1

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript

Core CS: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), DBMS fundamentals

Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, RESTful APIs, Maven

Frontend: HTML5, CSS3, JavaScript, React (basic), Bootstrap 5

Database: MySQL

Testing & Tools: JUnit 5, Mockito, MockMvc, Git, GitHub, Postman

AI-Assisted Development: Regular use of AI coding assistants (e.g., GitHub Copilot, ChatGPT) for debugging and code generation

Professional Skills: Analytical Problem-Solving, Communication & Collaboration, Eagerness to Learn, Team-Oriented

EXPERIENCE

Web Development Intern — Wheeltrix

[25 Jun 2026] – [25 Aug 2026]

- **Authentication & RBAC:** Engineered a stateless authentication and role-based access control system in Java/Spring Boot using Spring Security, JWT (JJWT), and BCrypt password hashing, securing 15+ REST endpoints across 3 user roles (Admin, Faculty, Student).
- **REST API Development:** Analyzed feedback-workflow requirements and built 3 REST API services (FeedbackFormService, QuestionService, FeedbackAssignmentService) supporting 5+ question types and multi-criteria targeting by department, semester, and batch for a system covering 1,000+ student profiles.
- **Testing & Reliability:** Resolved recurring unhandled server errors via centralized exception handling (@RestControllerAdvice), validated with a 92-case automated test suite (JUnit 5, Mockito, MockMvc, TestRestTemplate).

PROJECTS

Placement Prep Platform

Java, Spring Boot, React, MySQL, JWT

- Designed and developed a full-stack placement-readiness platform with Spring Boot (Java) and React, combining DSA practice tracking with automated resume evaluation for campus placement preparation.
- Implemented stateless JWT authentication with Spring Security and BCrypt password hashing, including server-side token expiration and refresh handling.
- Built a resume ATS analyzer using Apache PDFBox for text extraction and a keyword-matching algorithm that scores resumes against job descriptions and generates feedback.
- Wrote and executed JUnit 5 and Mockito test suites to validate cloud-storage fallback logic and catch edge cases before release.

Secure Ranked Multi-Keyword Search System

Java, Spring Boot, Spring Security, JWT, MySQL, AES-256

- Designed and developed a Searchable Symmetric Encryption (SSE) application enabling multi-keyword search over AES-256-encrypted files without exposing plaintext or decrypting data server-side.
- Re-architected a legacy JSP/Servlet codebase into a Spring Boot REST API using Spring Data JPA and Hibernate (Java-based backend), with stateless JWT authentication for role-based access control.
- Built a TF-IDF-based relevance ranking algorithm to sort encrypted search results without revealing plaintext keywords, paired with a responsive Bootstrap 5 dashboard.

CERTIFICATIONS

- Java Developer — Infosys Springboard
- Introduction to SQL — Simplilearn SkillUp

LEADERSHIP & RESPONSIBILITIES

Treasurer, Infonex Association

2025 – Present

- Managed the association's finances and event-related budgeting, and coordinated with faculty and student teams on technical events.

Team Lead, Techtrix Hackathon

- Led the organizing team for the Techtrix Hackathon, coordinating volunteers, logistics, and participant management with faculty and student coordinators.
